# **GANZ** **CORTROL**

## GANZ CORTROL INTELLIGENCE

*Intuitive configuration and deployment allows you to spend your time managing your IP infrastructure, not troubleshooting it. 64-bit architecture means CORTROL is built from the ground up for performance, and a long list of add-ons provide exceptional customization options.*

**GANZ CORTROL**  
**Prime**  
16 Channel System – FREE

**GANZ CORTROL Prime** provides a robust feature set to get any home or small office set up with up to 16 channels, 16 GANZ security cameras or a combination of 8 GANZ and 8 from any other major vendor or ONVIF compatible camera.

**GANZ CORTROL**  
**Premier**  
Standalone System – 24/48/96 Channels

**GANZ CORTROL Premier** features an intuitive and elegant user interface paired with advanced features and unlimited remote users. It's a fully manageable standalone system and virtually limitless across any network, right at your fingertips.

**GANZ CORTROL**  
**Global**  
Enterprise System – Unlimited Channels

**GANZ CORTROL Global** is a complete surveillance solution for enterprise networks of any size and offers 64-bit processing power with a unique feature set to keep security efficiency as a number one priority.

Get the most out of your video wall in the control room. Create custom video wall configurations or force users to specific video walls with CORTROL Global. Create "Area Focused" video walls to quickly review footage.

## KEY FEATURES

- Highly-secure encrypted camera and client communication
- Powerful event and action manager
- Real-time geolocation / map / mobile-tracking
- Access control integration
- Video wall for enterprise command center
- Powerful FR, LPR & VCA modules
- No costly SSA agreements

**DELL EMC**

The D-1X and D-2XR **Enterprise Servers** are developed on Dell EMC infrastructure and designed to provide the flexibility, performance and scale needed to support the high camera counts, megapixel resolutions, high frame rates and long retention times demanded by the industry. Optimized to work with Ganz® CORTROL Series Surveillance software.

# A WHOLE NEW LEVEL OF CONTROL

*GANZ CORTROL is an event-driven VMS that delivers complete IP surveillance network management and scalability, with a lower total cost of ownership.*

## Intuitive and User-friendly

The CORTROL interface allows all users to easily understand the configuration process and start using the software.

## The Complete System

The essential and advanced software features allow you to make the most of your surveillance system.

## Enterprise Ready

Central server hierarchy, failover, archive replication and many other high level features. Available in 3 editions, **CORTROL Global** is the ideal system for large-scale solutions.

## Time-proven Performance

Quality and stability of the software's core is proven and backed up by Gantz's years of experience and continuous development.

# GANZ CONTROL MODULES

## LPR Module

GANZ CONTROL LPR is software for detecting, recognizing and registering vehicle license plates. It offers a very high level of reading reliability, an intuitive installation process and great usability characteristics.

The software is ideally suited for vehicle access and traffic control, as well as enforcement applications. CONTROL also offers multiple customization possibilities for specific license plates and different types of transportation (trains, trucks, cars, etc.).

## Face Recognition

GANZ CONTROL Face Recognition is a biometric application that is designed to work with CONTROL Premier and Global editions.

The technology assures system performance and reliability with live face detection, simultaneous multiple face recognition and fast face matching in 1-to-1 and 1-to-many modes. CONTROL Face Recognition is ideally suited for human resource control as well as security and enforcement applications

## VCA Module

CONTROL VCA is a real-time video analytics engine that utilizes advanced image processing algorithms to turn video into actionable intelligence.

At the core of the product is an advanced object tracking engine that continually tracks moving and stationary targets. Easy to set up, CONTROL VCA automatically adjusts to site conditions, making it ideal for both experienced and untrained personnel to use.

## API Module

CONTROL offers customizable integration with other software systems in form of software development kit (SDK), CONTROL VMS Client Kit.

CONTROL VMS Client Kit is the collection of ActiveX software components which allow integration of CONTROL client side functionality into other software products and integration between CONTROL and third party software systems.
